

PONY BIKES

May 2017

Lead Mobile Developer – Pony Bikes – ASAP

Let the dream come true

The company

Pony Bikes is a newly founded well-funded start-up that does bike sharing. Our system is a bit like Barclay's bikes but without docking stations. It's super simple: get the app, unlock the bike, drop it when you are done. No docking, no hassle 😊

Offices are based in London, London Fields area.

The role

We are looking for a talented and experienced mobile developer (iOS + Android) to lead the app development effort. The app is an essential part of the product and is the main point of contact with the customers. This means that the UX must be perfect. As its designer, you will have a central role in the company.

You will be working directly with the CTO and the CEO (both devs themselves) on the design and on the implementation of the mobile applications, but you will ultimately be the one responsible for the design choices as well as getting the right team on board.

Main role:

- Bring the app from Demo to MVP stage (integrate payment solutions, account management, custom BLE accessories, GPS positioning, integration with in-house backend)
- Make sure that the UX is perfect
- Get the app ready to scale across cities and countries
- Optimise background communication with BLE accessories

The ideal candidate:

- Shipped a world-class app before
- At least 3 years of experience in a similar role
- Full exposure to the app development cycle
- Passionate about UX and loves creating beautiful designs
- Extensive experience integrating with RESTful web service APIs
- Strong understanding of the value of unit testing and related techniques

- Excellent communication skills working across multiple disciplines and generally getting stuck in to whatever is required
- Experience with Git
- Exposure to server-side and/or embedded development would be advantageous.

Details

- Competitive Pay (£35 - £60)
- Equity / stock options
- Free biking!

To apply please send CV and cover letter to jobs@ponybikes.co with email subject 'Lead Mobile Developer Role June 2017'
